

ENTRON

Controls for Resistance Welding

MS700 MICROSTAR700

Constant Current Bench Controls

Features

- Spot welding
- 1/2 Cycle(+), 1/2 Cycle(-), or Alternating (+/-)
- Bright vacuum fluorescent display
- Dual weld intervals plus Pulsation
- Constant Current regulation or Current Monitor
- 16 programs (internal or external selection)
- Current monitoring: High/Low Current Limit, Pre-limit, programmable blocking
- Retract/High-lift control
- Weld Counter (programmable blocking)
- Primary or Secondary feedback via Toroid or CT
- Primary CT provided
- Toroid and CT calibration functions
- Toroid test function
- Disable programming function
- Secondary Toroid is an available option

Control cabinet with door-mounted timer, up to 16 programs, constant current control and monitoring. Air-cooled thyristors.

Exclusive ENTRON two year warranty
